

PROJECT PROFILE

Enhancing Landscape and Ecosystem Management (ELEMENT)

The Project geographical areas consist of sixteen (16) districts of Nagaland:

Mon, Phek, Meluri, Zunheboto, Wokha, Kiphire, Mokokchung, Kohima, Tseminyu, Chumoukedima, Longleng, Noklak, Tuensang, Niuland, Peren, and Shamator

Zone I

Peren, Chumoukedima & Niuland, Kohima, Phek & Meluri

Zone II

Tseminyu, Wokha, Zunheboto, Mokokchung

Zone III

Mon, Kiphire, Shamator, Tuensang, Noklak, Longleng

EXPECTED OUTCOMES OF THE PROJECT

- Enhanced capacity of 225 local communities in landscape planning and management
- 13,100 ha. of areas with enhanced conservation and management practices
- 57,500 people with increased benefits from landscape-based value chains
- New or better jobs created for 28,750 youth and women
- 3,91,680 people with enhanced resilience to climate risks
- 225 community groups reached with extension and knowledge products
- 33% women's representation in Executive Committees of Village Management Committee
- Restored 4,900 ha. of degraded agricultural land
- Restored 8,200 ha. of degraded forest lands
- Restored 34 ha. of degraded wetlands
- 9,200 ha. of areas brought under enhanced biodiversity conservation Areas
- 100 numbers of community groups integrated into sustainable High Value Forest Product (HVFP) value chains
- 100 numbers of forest-based enterprises incubated
- 5,000 producers of HVFPs with improved market access

Total project cost

Rs. 718.28 crore

Total State loan

Rs. 143.66 crore

Number of Villages	225
Number of Beneficiaries	57,500

Project beneficiaries:

Rural households, forest-dependent communities, and resource user groups that are interested in adopting landscape restoration practices.
